SCIENCE BOOKS & FILMS YOUR REVIEW GUIDE TO SCIENCE RESOURCES FOR ALL AGES

Science Books & Films (SB&F) gives you the expert information you need to make the best decisions when choosing science materials for your library, classroom, or institution. Thousands of librarians, teachers and administrators are already using *SB&F* as their standard guide to science materials. If you make decisions about resources for your school library or education institution, you will benefit from this valuable “tool of the trade.”

Published by the American Association for the Advancement of Science, *SB&F* is the only critical review journal devoted exclusively to print and nonprint materials in all of the sciences and for all age groups. Every issue contains more than 150 evaluations of books, audiovisual materials, software, and websites for general audiences, teachers, and students from kindergarten through college.

- ◆ Reviews are written by scientists, science educators, and other professionals who have the specialized knowledge needed for in-depth evaluations of science materials.
- ◆ Books, films, and software are evaluated on criteria such as scope, accuracy, clarity, organization, and quality of illustrations or cinematography.
- ◆ Items reviewed in *SB&F* cover all of the physical, chemical, biological, medical, social, and behavioral sciences; mathematics; computer science; and technology.
- ◆ Each review begins with several “quick reference” codes indicating “suggested reading (or viewing) level” and whether the title is “highly recommended,” “recommended,” “acceptable,” “questionable,” or “not recommended” for specific groups.
- ◆ Every review includes complete bibliographic and ordering information, so you don’t have to search through other sources for price, publisher (or producer), ISBN, available formats, and so on. You can also order featured books online through Amazon.com.
- ◆ Subscribers have access to *SB&F Online*, featuring a searchable database of reviews from the past 9 years.
